

# ASSOCIATE OF APPLIED SCIENCE IN HEALTHCARE ADMINISTRATION

MATC 1502	Medical Law and Ethics
<b>Total Semester Hours</b>	
<b>61-65</b>	

The Healthcare Administration Program is designed to provide the educational background to enable graduates to pursue careers in healthcare management and administration. Healthcare administrators and managers plan, direct, and coordinate medical and health services. They might manage an entire facility, a specific clinical area or department, or a medical practice for a group of physicians. Healthcare administrators and managers must direct changes that conform to changes in healthcare laws, regulations, and technology. Most healthcare administrators and managers work in offices in healthcare facilities, including hospitals and nursing homes, and group medical practices. Students in the healthcare administration program will study courses in healthcare management, marketing, human resources, healthcare finance, and medical law and ethics. This knowledge will make the healthcare administrator or manager a valuable member of the healthcare management team. Graduates are employed in career areas such as hospitals, clinics, nursing homes, physician offices, and a variety of other healthcare facilities.
