BACHELOR OF ARTS IN MULTIMEDIA COMMUNICATION, SPORTS BROADCASTING TRACK

Overview

The sports broadcasting track was designed to prepare students for the everexpanding field of sports media. Students on this track have direct access to sports broadcasting opportunities through Youngstown State University Athletics, including NCAA Division I sports, via Horizon League and Missouri Valley Conference (i.e., Penguin football, basketball, soccer) streams and broadcasts. Students learn the process of preparing content through the preand post-production phases as well as evaluation of the content.

This curriculum is designed to prepare students in pursuit of careers not only in sports broadcasting, but also in expanding avenues of communication such as media sales and advertising, storytelling and content creation, writing and editing, and independent production. Sports media internships are available at regionally based, national and international media organizations such as ESPN and Fox Sports affiliates and flagship locations.
