

BACHELOR OF ENGINEERING IN ELECTRICAL ENGINEERING, BIOMEDICAL TRACK

Through the Electrical Engineering program at Youngstown State University, you'll develop competency in all aspects of electrical engineering and its related fields. You'll take coursework anchored in engineering, math, and physics that will allow you to solve complex problems and design intricate systems. Along the way, you'll also refine your communication skills and learn how to ethically and responsibly deploy your engineering skills.

Electrical engineers have homes in a large assortment of industries, from power generation and automotive manufacturing to biomedical development and consumer product design. You may even find yourself using your engineering expertise to serve your country in the military.

With your bachelor's degree in hand, you'll be the person advancing the products and systems that advance society.

MAJOR

Design projects, computer simulation and hands-on laboratory sessions are the pillars of the Electrical Engineering major at YSU. Students enrolled in the program may choose from three options that prepare graduates for a large variety of professional positions or advanced studies:

- Traditional Option (<https://ysu.edu/academics/science-technology-engineering-mathematics/electrical-engineering-major/#panel0>)
- Computer/Digital Option (<https://ysu.edu/academics/science-technology-engineering-mathematics/electrical-engineering-major/#panel1>)
- Biomedical Option (<https://ysu.edu/academics/science-technology-engineering-mathematics/electrical-engineering-major/#panel2>)

Internships (Optional)

The following internship courses are recommended, but not required

STEM 3790	STEM Internship Experience	
STEM 4890	STEM Internship	

The following two science courses are recommended for students to prepare for the MCAT test, but are not part of the degree requirements:

CHEM 3785	Biochemistry 1	
BIOL 3702	Microbiology

Student Outcomes

The following (1 through 7) Student Outcomes support the program educational objectives. Attainment of these outcomes by students by the time of their graduation prepares graduating students to enter the professional practice of engineering.

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
